RE: DRAFT, OU 3 TECHNICAL MEMORANDUM NO.2 - EXPOSURE SCENARIOS, April 23, 1993

Dear Mr. Hestmark:

The Hazardous Materials and Waste Management Division of the Colorado Department of Health has reviewed the above referenced document. In general, we feel that because of the nature and setting of OU 3, extra caution ought to be exercised in dismissing certain scenarios at this stage, even though they may appear unlikely. A larger number of pathways should be considered for assessment. Our specific comments are attached.

If you have any questions these comments, please contact Carl Spreng of my staff at 692-3358.

Sincerely,

Gary W. Baughman

Chief, Facilities Section

Hazardous Waste Control Program
